The presence of psychologists at the time of entrance of the inmates to the prison and in the patios is requested.

- Health Prevention: It is informed that a single shaving machine is being used for shaving all people in the patio and without due asepsis, which has generated fungus in the inmates population of the patio. The inmates require information on personalized prevention programs, for the one presented in the last few days was transmitted in a loud speaker and it wasn't understandable.
- Water: Deficient supply o water, both for consumption as well as for personal hygiene (water does not reach the showers)
- Bathrooms: Uneasiness due to the closeness of the bathrooms to the dinning room, due to dignity conditions. Also, some bathrooms are not in good operating conditions.
- Food: Variety of products in the stores is requested (inclusion of vegetables, fruits, chicken). Also, the inmates have requested to study the possibility of allowing the entrance to the cell of the chicken leftovers they buy during the date of visit, as for avoiding the waste of this food.
